COMPANY SUMMARY

Professional Med Transportation LLC was established in February 2024. We are committed to delivering more than just a ride: we provide a lifeline to medical care. Our mission is to offer convenient, affordable, and professional transportation services for non-emergency medical needs to our greater communities. Although, we are a very young company, over the past few months, we have made a huge difference in our community by helping our elderly family in our community have transportation services that they can count on to get them to their doctor's appointment safely and timely.

OUR CORE COMPETENCIES

We are a Non-Emergency Medical transportation company. To provide safe and professional transportation services to our clients, we ensure that our drivers can provide safe emergency responses to the clients they are transporting by making sure that each driver is certified to provide CPR or First Aid whenever there is a need for it during each transportation.

Our fleet is brand new, and we ensure that they are regularly maintained to ensure that they do not break down while a patient is being transported to their appointment location.

SERVICES WE OFFER

- Dialysis appointments
- Doctors visit
- Hospital Surgery appointments
- Family event transport
- Community event for disables
- Shopping mall

FLEET AND AMENITIES

Our FLEET are High Roof which can transport up to three Wheelchair patients and five seated passengers in single trip. We can transport eight total passengers including the driver in a single trip making it possible for family and care givers to be present with their family or patients during the transportation period.

Our fleet is equipped with a security camera which can record the interior and exterior of the fleet during the entire transportation period.

INDUSTRY STANDARDS

We ensure that our drivers are trained to follow industry standards as listed below as well as ensure that we follow all federal transportation guidelines. We are committed to ensuring that our drivers take all necessary measures to ensure our clients' personal and medical data is safe and uncompromised.

- HIPPA
- FTA
- DOT
- Regular drug and alcohol test
